

JAPANTHER

SPRING, FALL, MILD WINTER

Designed specifically for cool and wet conditions, Japanther provides a high level of water resistance, moisture regulation and comfort in a performance cycling shoe. Constructed with a waterproof membrane and rubberized shell that extends above the ankle, Japanther delivers unrivaled weather protection in the wettest and muddiest of conditions. Goodbye shoe covers.

25°F+ / -3°C+ COMFORT

JAPANTHER

OUTER FEATURES

Water-Resistant Zipper

Runs flat across the top of the foot from big toe to outside of ankle, minimizes stress and optimizes the performance of the zipper coils

Rubberized Lace Cover

Protects and stores laces away from wet and muddy riding conditions

JAPANTHER

OUTER FEATURES

Adjustable Ankle Pipe

Inner and outer power straps allow adjustability of ankle diameter, accommodating more ankle sizes and providing a better seal from the weather elements

Waterproof-Breathable Membrane

Blocks liquid molecules from the outside and releases heat vapor from the inside

JAPANTHER

HEEL FEATURES

Hi-Visibility Heel

Hi-visibility heel webbing for more safety while riding in the dark

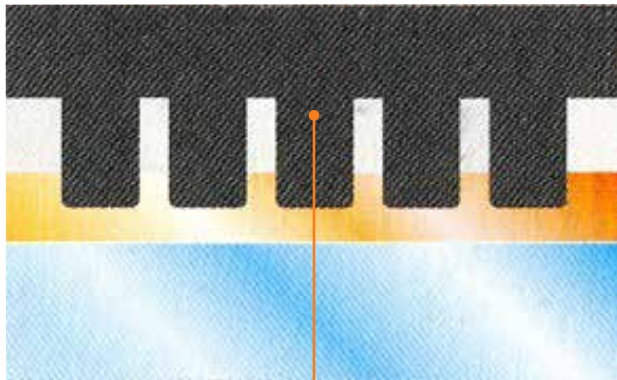

JAPANTHER

OUTSOLE TECHNOLOGY

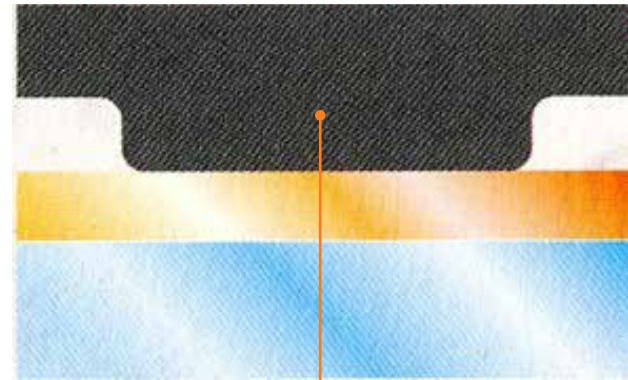

ANTI-SLIP MICROGLASS RUBBER

Microglass Filament

Penetrates surface moisture
(enhances traction)

Normal Shoe Outsole

Glides on top of surface moisture
(loss of traction)

JAPANTHER

OUTSOLE

Microglass Filament Lugs

Enhance the slip resistance under the toe and heel and are optimal for wet weather conditions

Spacious Toe-Cleat Interface

Large enough to accommodate plate-style baseball cleats and adequately shed mud

Sealed Cleat Pocket

Waterproof membrane behind the cleat pocket blocks water and ensures comfort

Nylon Midsole

Provides stiffness and support for long rides and competitive cyclocross activities

Open Lug Pattern

For shedding mud, increasing traction, and reducing weight

JAPANTHER

FOOTBED

Three-Piece Footbed

Provides optimal thermal performance and comfort where needed

Waffle EVA Foam

Creates air space under the foot to trap heat and provide comfort

Arch Support

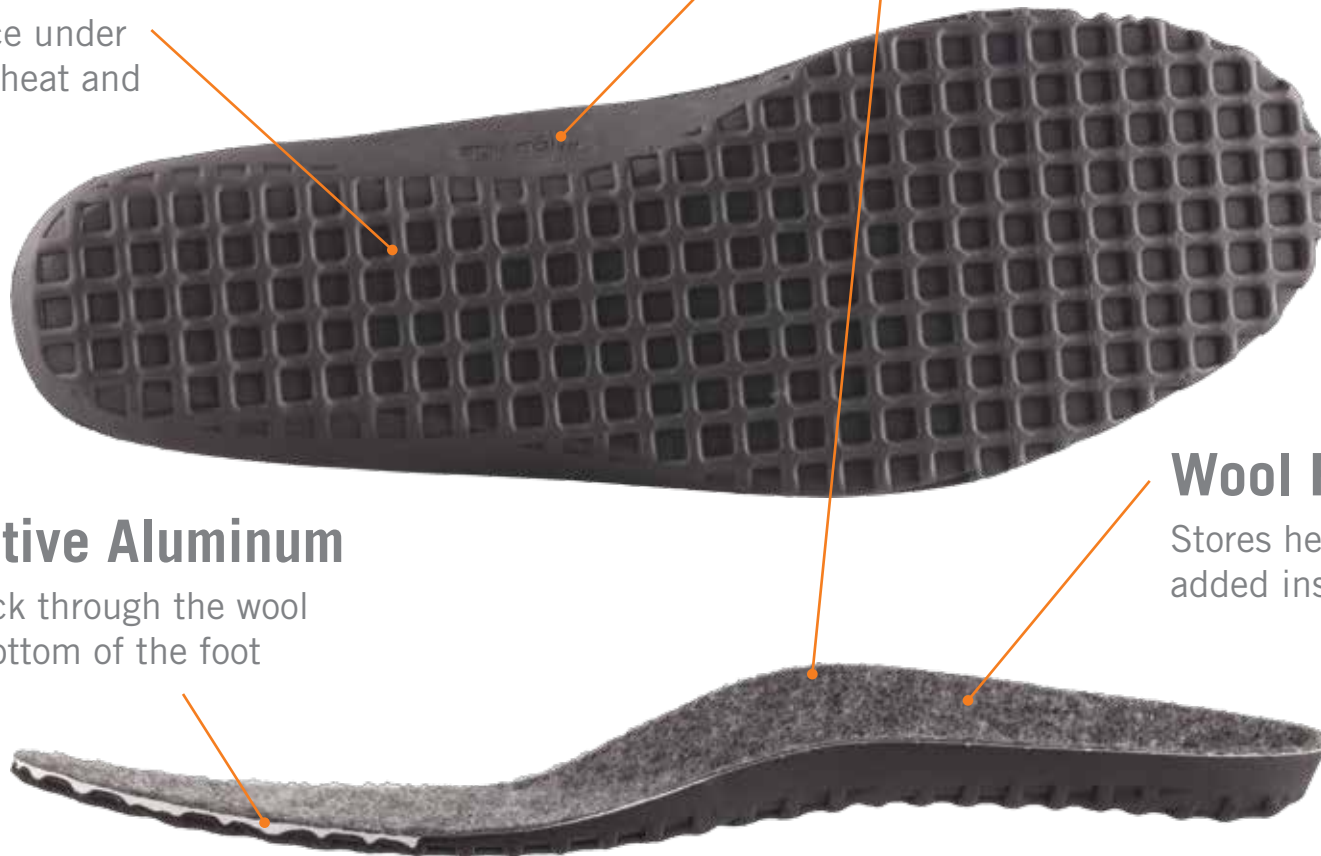

For comfort on long rides and competitive cycling when running/walking is required

Heat Reflective Aluminum

Reflects heat back through the wool felt and to the bottom of the foot

Wool Felt (1mm)

Stores heat and provides added insulation value

JAPANTHER

TECHNICAL SPECIFICATIONS

FEATURES

Waterproof-breathable membrane for moisture control, adjustable ankle diameter for better fit and protection, water-resistant zipper, anti-slip outsole, 2-bolt SPD and 3-bolt road versions

UPPER

Rubberized textile, stretch poly, durable PU mudguard

OUTSOLE

Real rubber, anti-slip micro-glass filament lugs (SPD MTN version); nylon bumpers on toe and heel (ROAD version)

MIDSOLE

Fiberglass-injected nylon with high impact resistance

CLOSURE

Cord lace inner closure, #5 zippered outer closure with water-resistant coating

SIZES

Mens wide 36–50 (no size 49), full sizes only

LASTS

Performance last designed for rigorous training and competition positions the foot for optimal energy transfer, with a roomy forefoot that provides comfort for longer rides

SUGGESTED TEMPERATURE RANGE

25°F (-3°C) and warmer

\$225 MSRP - 2-BOLT MTN

\$225 MSRP - 3-BOLT ROAD
